

iPower Energy Group, LLC completes 9.24 kW residential solar energy system in Murrieta, CA

iPower Energy Group, LLC ("iPower Energy") is pleased to announce that it has completed the design and installation of a 9.24 kW rooftop solar system in Murrieta, California.

Murrieta, CA - iPower Energy, a local [solar energy services](#) company has announced the completion of a 9.24 kW solar energy system in Murrieta. The home, located in North Murrieta, was built in 2005 and is 2,802 square feet, has 4 bedrooms, 4 baths and will generate clean solar-powered energy, eliminating the homeowner's traditional monthly Southern California Edison bill. Energy Service Partners helped facilitate the project and the homeowner will be credited according to Southern California Edison's Net Metering program.

The solar system features 21 Aptos 440W premium solar panels and will generate enough electricity to offset grid usage with 110 percent renewable and locally generated energy. The array was designed to produce 14,480 kilowatt hours of solar electricity each year, enough to offset 13,810 pounds of carbon dioxide emissions annually, the equivalent of planting 7.4 acres of trees.

"Another successful project in partnership with Energy Service Partners underscores our commitment to providing money-saving [clean-energy solutions](#) for Murrieta homeowners and empowering the City of Murrieta to meet its sustainability goals," explained Joel Hall, Managing Director of iPower Energy.

Southern California Edison offers Murrieta customers, who switch to [clean solar energy](#), a rate option called Net Energy Metering (NEM). The NEM option allows homeowners' to receive a credit for the surplus electricity they supply to the electric grid through clean solar energy.

Murrieta, SoCal Edison customers in the market for solar panels, who own their home, are encouraged to call iPower Energy for a free, no obligation, over the phone or in-home consultation to discuss their solar savings, the NEM rate plan and which solar financing option is most suitable for them. The company takes a consultative approach that prioritizes understanding the needs of each homeowner while providing knowledgeable insight.
